

XJ80 4" SULZER DRAINAGE PUMP

The submersible drainage pump XJ 80 is ideal for pumping water and dirty water mixed with light abrasives. Pumps with built in AquaTronic unit will always have correct direction of impeller rotation, ensuring peak performance and reduced wear. 50 Hz: head max 76 meters, flow max 52 l/s. 60 Hz: head max 94 meters (308 feet), flow max 37 l/s (587 gpm).

FEATURES

Plug-and-pump installation without having to worry about overheating.

Reliable, trouble-free operation also at low water levels.

Pumps with built-in AquaTronic unit will adjust incorrect phase order, ensuring correct impeller rotation.

Modular design increases serviceability and makes it easy to convert the pump for different hydraulic requirements. Pumps with built-in AquaTronic can be checked without disassembly, using its service software.
