

J405 8" SULZER DRAINAGE PUMP

The low weight and compact design of the submersible drainage pump J 405 ensure convenient transport, handling, and installation. The pump is ideal for pumping water and dirty water mixed with light abrasives. 50 Hz: head max 90 meters, flow max 160 l/s. 60 Hz: head max 101 meters (331 feet), flow max 160 l/s (2540 gpm).

FEATURES

- Plug-and-pump installation without having to worry about overheating.
- Reliable, trouble-free operation also at low water levels.
- High wear resistance ensures years of cost-efficient pumping.
- Modular design increases serviceability and makes it easy to convert the pump for different hydraulic requirements.
