

SG2070-100L 150litre 3 hp BELT DRIVE COMPRESSOR

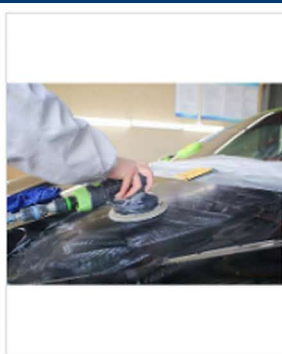

This air cooled compressor is equipped with an oil-water separator and high quality intercooler. This helps to cool the compressed air, ensuring the stability of compressed air in the gas tank and prolongs the compressor service life. Due to its strong power, it can provide 300L of compressed air per minute, which is then used for a driving machine, grinding machine, or other large machines.
