

PX404E

CLEAN WATER BOOSTER PUMP FITTED WITH INVERTER

The PX404 is a new generation of variable frequency pump capable of delivering constant pressure in a range of water supply applications. The unit consists of pump, inverter and pressure system, which allows big flow, pressure and stable operation. The whole unit is robust, lightweight and easy to fit & operate. The inverter automatically adjusts the running frequency of the motor to ensure constant pressure throughout the whole system.

TECHNICAL

- Max flow: 150 litres p/m
- Max head: 45 metres
- Rated flow: 67 litres p/m
- Rated head: 32 metres
- Max suction head: 7 metres
- Power: 230vt
- Inlet/Outlet dia.: 1"

FEATURES

- Suitable for transferring clean water without abrasive particles
- Max ambient temperature: 40 C
- pH 6.5 to 8.5

ENVIRONMENTS

- Building & Construction
- Domestic water supply
- Small Irrigation
- Landscaping
- Gardening
- Water Conservation
- Commercial / Industrial applications
